Journal of Vascular Medicine and Biology

February–December 1991
Volume 3

Contents

Number 1, February 1991

Original Articles

Comparison of the Vasodilation and Inhibition of Phosphatidylinositol Hydrolysis Produced by KT-362 and TMB-8 in Canine Femoral Artery 1
Cecilia J. Hillard, Paul W. Hruz, and Garrett J. Gross

Recovery of Endothelial Function Following Myocardial Ischemia and Reperfusion in Rats 5
Philip S. Tsao and Allan M. Lefer

Adenosine Does Not Regulate the Proliferation of Cultured Capillary or Coronary Sinus Endothelial Cells 11
Sadatoshi Biro, Tomoya Iino, Stephen E. Epstein, and Ward Casscells

Second Ochsner International Symposium on Molecular Biology in Hypertension

Introduction: Second Ochsner International Symposium on Molecular Biology in Hypertension 20
Edward D. Frohlich

Role of Angiotensin II in Cardiovascular Growth Regulation 22
Richard Re, Chen Li, and Om Prakash

Role of Angiotensin in the Control of Vascular Smooth Muscle Growth 25
Richard E. Pratt, Hiroshi Itoh, Gary H. Gibbons, and Victor J. Dzau

Cardiac Actions of Angiotensin 30
Kenneth M. Baker

Second Ochsner International Symposium on Molecular Biology in Hypertension

Introduction: Second Ochsner International Symposium on Molecular Biology in Hypertension 20
Edward D. Frohlich

Role of Angiotensin II in Cardiovascular Growth Regulation 22
Richard Re, Chen Li, and Om Prakash

Role of Angiotensin in the Control of Vascular Smooth Muscle Growth 25
Richard E. Pratt, Hiroshi Itoh, Gary H. Gibbons, and Victor J. Dzau

Cardiac Actions of Angiotensin 30
Kenneth M. Baker

Modulation of the Cardiac Phenotype by Transforming and Fibroblast Growth Factors Resembles the Induction of Fetal Cardiac Genes During Pressure-Overload Hypertrophy 38
Thomas G. Parker, King-Lau Chow, Robert J. Schwartz, and Michael D. Schneider

Cell Biology of Myocardial Remodeling: Contribution of Nonmyocyte Cells 44
Karl T. Weber, Christian G. Brilla, and Joseph S. Janicki

Preparation and Analysis of Transgenic Rats Expressing the Mouse *Ren-2* Gene 50
M. Lee, Y. Zhao, D. Ganten, F. Zimmerman, U. Ganten, S. Bachmann, M. Bader, and J. J. Mullins

Number 2, April 1991

Intravital Observation on the Endothelin-Induced Hemodynamic Changes in Rat Intestinal Microvascular Beds 55
Iwao Kurose, Soichiro Miura, Dai Fukumura, Makoto Suematsu, Eiichi Sekizuka, Hirokazu Tashiro, Hiroshi Serizawa, and Masaharu Tsuchiya

Cyclic Stretching Affects Sodium and Potassium Transport in Vascular Endothelial Cells and Its Response to Brandykinin 61
N. C. Adragna

Functional Comparison of a Rat Neutrophil-Derived Relaxing Factor with Nitric Oxide, Sodium Nitrite, Sodium Nitrate, and Sodium Nitroprusside 68
Robert J. Sturm, Laurel M. Adams, Deborah A. Holloway, Susan J. Armstrong, Barry M. Weichman, and Thomas J. Rimele

Abstracts from Progress in Physiology, Pharmacology and Functional Investigation in the Field of Vascular Pathology, May 23–26, 1991, Venice, Italy 75

Number 3, June 1991

5-HT2 Receptors in Cerebral and Peripheral Vascular Pathology: A Review 101
Nicolas Wiernsperger and Jean Rapin

Selective Expression of the Vascular Addressin Recognized by MECA-79 on Endothelia in Endocardial Infiltrates of Human Heart Allografts 113
Bruce M. McManus, Yuling Ye, Phillip R. Streeter, Eugene C. Butcher, Gayle L. Winters, and Tony R. Zerbe

Effects of Quinapril on Systemic and Regional Hemodynamics and Cardiac Mass in Spontaneously Hypertensive and Wistar-Kyoto Rats 117
Katsuyuki Ando, Edward D. Frolich, Yongwei Chien, and Barbara L. Pegram

Thrombomodulator Production by Human Saphenous and Umbilical Vein Endothelial Cells in Culture 124
Jian-ming Li, Michael J. Menconi, Valerie A. Klassen, Michael J. Rohrer, Jack E. Ansell, and H. Brownell Wheeler

Platelet Factor 4 Release by Heparin (HR-PF4) in Patients with Thrombocytosis 134
Giuseppe Cella, Francesco Stevanato, Rossella Paolini, Patrizia Veronese, and William E. Strauss

Number 4, August 1991

Special Issue

3rd International Symposium on Calcium and Gene Hypertension

Preface 139
R. Kent Hermsmeyer, Fritz R. Bühler, and Koichi Sato

Hypoxia and vascular muscle tone in normal and arteriosclerotic human coronary arteries 140
G. Siegel, F. Schnalke, J. Schaarschmidt, J. Müller, and R. Hetzer

Potassium channels mediate vasodilatory response to calcitonin-gene-related peptide in rat tail artery 150
Philip B. Furspan and R. Clinton Webb

Caffeine-sensitive and insensitive intracellular calcium stores in vascular smooth muscle cells of the guinea pig 154
Tatsuro Yamamoto, Masamitsu Iino, Toshiko Yamazawa, and Makoto Endo

Differences in the profile of phospholipase activation by norepinephrine and endothelin-1 and related differences in functional responses of rat aorta 161
Allan W. Jones, Yu Liu, Susan B. Jones, Shivendra D. Shukla, and Brinda B. Geisbuhler

Effect of ryanodine in dog mesenteric artery: Interference with potassium and adrenergic stimulation 167
J.-P. Bourreau, C. Y. Kwan, and E. E. Daniel

Changes in Ca^{2+} sensitivity by release-restitution of cytosoluble proteins in perforated arterial smooth muscle cells 174
Giacomo Bruschi, Maria E. Bruschi, and Alberico Borghetti

Calcium and the malfunction of the plasma membrane in hypertension 178
Anna F. Dominiczak, R. Clinton Webb, and David F. Bohr

Ca^{2+} sensitization of vascular smooth muscle 181
Kooichi Saida, Yoshihisa Manabe, and Hitomi Seki

Three-dimensional organization of organelles in an arterial smooth muscle cell 187
Linda J. McGuffee, Juanita Mercure, and Sally A. Little

Cloning and characterization of angiotensin II receptor and its regulation in bovine adrenocortical cell and rat kidney 192
Tadashi Inagami, Katsutoshi Sasaki, Naoharu Iwai, Yoshiaki Yamano, Smriti Bardhan, Fumiko Konishiih, Shigeyuki Chaki, John J. Murray, and Mamoru Hasegawa

Effects of in vivo treatment with pertussis and cholera toxins on pressor effects mediated by α-adrenoceptor agonists and vasopressin: Changes in hypertension 197
Chris R. Triggle and Reza Tabrizchi

Cellular and subcellular clues to hypertension: Assessment from calcium mobilization data 205
M. Kamouchi, T. Akata, Z. Xiong, R. Inoue, K. Kitamura, and H. Kuriyama

Calcium channel hypothesis in hypertension 219
Kent Hermsmeyer and Ka Bian

Alpha- and beta-adrenoceptor-mediated responses of arteries from spontaneously hypertensive rats: Analyses of subtypes 223
Seigo Fujimoto, Tomohiro Matsuda, and Kyuzo Aoki

Decreasing cellular Mg^{2+} by increasing extracellular Na^{+} increases the bound Ca^{2+} fraction mobilized by agonists in vascular smooth muscle 229
Suraj S. Shetty and George B. Weiss

New idea on the mechanism of hypertension: Suppression of nitroxidergic vasodilator nerve function 235
Noboru Toda, Yoshihiko Kitamura, and Tomio Okamura

A humoral factor produced by endothelial cells hyperpolarizes arterial smooth muscle membrane 242
Hikaru Suzuki, Yoshimichi Yamamoto, Guifa Chen, and Kyoko Miwa

Bradykinin-activated K^{+} channels in the cultured endothelial cells of bovine aorta 246
Yoshimichi Yamamoto, Kyoko Miwa, and Hikaru Suzuki

Deterioration of contraction induced by repetitive application of noradrenaline and roles of endothelium in aorta from spontaneously hypertensive rats 251
Satoru Sunano, Yoshiko Hosogi, and Keiichi Shimamura

Phorbol-ester-induced contraction of mesenteric artery from stroke-prone spontaneously hypertensive rats and calcium 256
Keiichi Shimamura, Satoru Sunano, and Kenzo Moriyama

Subsarcolemmal increase in intracellular calcium in vascular muscle cells from spontaneously hypertensive rats 261
Kent Hermsmeyer, Robert Land, and Paul Erne

Activated acyl coenzyme A—Cholesterol acyltransferase as a possible cause of rapid arterial fat deposition in genetic hypertensive rat models for atherosclerosis 268
Y. Yamori, S. Murakami, and Y. Nara

Angiotensin II induction of smooth muscle extracellular matrix synthesis in culture 271
Timothy Scott-Burden, Eleanor J. Mackie, Fritz R. Bühler, and Paul M. Vanhoutte

Intraplatelet tropomyosin and protein kinase C isoforms: Putative abnormalities in hypertensive platelets 277
Paul Erne, Maryse Crabos, Thomas Woodtli, Roland Imber, Doriano Fabbro, Toshi Yamakado, Claus W. Heizmann, and Fritz R. Bühler

Clonidine sensitivity in patients with essential hypertension as a function of red cell ion transport 285
Nathalie Senn, Said Hajem, Pierre Frohly, Jean-Pierre Ollivier, and Ricardo P. Garay

Molecular analysis of stretch-induced protooncogene expression in cardiac myocytes 290
Yoshio Yazaki and Issei Komuro

Environmental susceptibility in hypertension: Potential role of *HSP70* and *TNFα* genes 297
Michal Pravenec, Yu-Lin Sun, Jaroslav Kunes, Dewen Kong, Vladimir Kren, Pavel Klir, Johanne Tremblay, and Pavel Hamet

Molecular cloning of two subtypes of human endothelin receptor 303
Kazuwa Nakao, Hiroshi Arai, Kiminori Hosoda, Yoshihiro Ogawa, Osamu Nakagawa, Shin-ichi Suga, Shigetada Nakanishi, and Hiroo Imura

Increased growth-factor-stimulated DNA synthesis in SHR VSM cells is independent of protein kinase C activity 308
Ramesh C. Bhalla and Ram V. Sharma

Intracellular calcium, pH, and aggregation changes in spontaneously hypertensive rat platelets in response to extracellular acidosis 314
Parita Patel, Shubhra Sharma, and Ratna Bose

Symposium Abstracts 320

Indexes 341

Number 5, October 1991

Special Issue
Atherosclerosis Beyond Cholesterol

Introduction 351
Victor J. Dzau, MD, Guest Editor

Are Lipids the Only Cause of Atherosclerosis? 352
William P. Castelli

Changing Perspectives of Hypertension and Related Risk Factors 363
Michael A. Weber

The Pathophysiologic Interrelationships Between Hypertension and Atherosclerosis 371
William B. Applegate

Differential Effects of Antihypertensive Agents in Experimental and Human Atherosclerosis 382
Nowamagbe Omoigui and Victor J. Dzau

Antiatherosclerosis Clinical Trials Using Calcium Antagonists 392
M. Gene Bond, Michele Mercuri, Fenwick T. Nichols, Sleman A. Khoury, John Flack, and Albert A. Carr

Supported by an educational grant from Sandoz Pharmaceuticals Corporation

Number 6, December 1991

Special Article

Executive summary: Cell line workshop 403
Willa A. Hsueh and Michael C. Lin

Original Articles

Flow cytometric analysis of cell cycle in exponential growth phase of cultured aortic smooth muscle cells: Comparison of two different genetically hypertensive strains of rats 406
Masanori Hamada, E.L. Harris, J.A. Millar, and F.O. Simpson

The precision of measurements of resistance vessel dimensions: A guide to appropriate sample sizes 413
Michael J. Jamieson and Jorge A. Ontiveros

The vasculitides: Current imaging and clinicopathologic correlation 419
Krishna Kandarpa, Paramjit S. Chopra, Jai Chakrabarti, and Valerie Mandell

Acute deep vein thrombosis: Diagnosis, localization, and risk factors 432
Arie Markel, Richard A. Manzo, Robert Bergelin, and D. Eugene Strandness, Jr.

Abstracts from Nitric Oxide and Vascular Protection Meeting, November 5-6, 1992, Houston, Texas 440
